

**AMENDMENT TO THE SPECIFICATION**

Please amend the specification by marked up replacement paragraph(s) as follows.

At pages 2-3 of the specification, please replace paragraph [03] with the following paragraph:

--[03] FIG. 11 shows a diagram of a conventional wireless network in an autonomous GPS environment. As shown, a wireless network 1101 communicates with vehicles 1103 to track the location of these vehicles 1103 within the coverage area of the wireless network 1101. Each of the vehicles 1103 employs a GPS device 1105 that communicates with a constellation of satellites 1107. These satellites 1107 transmit very low power interference and jamming resistant signals received by the GPS receivers 1105. At any point on Earth, a GPS device 1105 is able to receive signals from multiple satellites (e.g., 6 to 11).--
